Weather Action Solar Weather Technique (SWT) forecasts provide: See p6 for fuller explanation • Most likely weather scenarios in each period. Note: relative changes between periods are more reliably forecast than details in each period. • The 'Solar Factor' most likely corrections which need to be applied a few days ahead to standard Meteorology forecasts (Smfs) - eg as issued on TV. • Confidence. Long range forecasts are in about 10 periods per month with confidences A, B, C - least confident which should be applied with more care.

SWT advice about changes between periods & how to improve standard computer forecasts - when they come to be made - are generally very skilled.

http://www.youtube.com/watch?v=EAV7NHZcEcY This 30day ahead Britain & Ireland forecast produced under SWT25d in 10 periods is the same in almost all respects as the 15-45day ahead forecast words and maps.

January 2010: Ferocious and dangerous winter weather with widespread waves of blizzards and drifting snow, bitter North/ North East winds, ice, sharp frosts and freezing fog at times. South/South West parts less cold at times with heavy rain. Becoming generally less cold in the last week when milder wet weather brings widespread thaw floods.

This January is likely to see exceptionally ferocious and dangerous weather with widespread serious disruption to travel mainly from snow and ice. Road salt is likely to run out in the UK. Later in the month floods due to rain deluges and thawing snow will cause problems. North/South splits give uncertainties for Midlands at times.

#### FULL FORECAST DETAILS in 10 time periods on pages 2 to 4.

**AND IN EUROPE!** The bitter cold weather includes the continent and the '11 cities' ice skating race ("Elfsteden Tocht") in Holland on frozen canals is a near certainty according to this WeatherAction long range forecast. The race last took place on 4 Jan 1997.

In terms of meteorological and Solar Weather Technique developments this January will see an 'Angry Jet Stream' - wild 'thrashing around' of the Jet stream (track of low pressure systems) caused by a series of 'Sudden Stratospheric Warming' type events in the polar stratosphere which will be driven by specific solar magnetic activity developments predicted by SWT25E. These will cause dartboard-type lows and blasts of very cold air at times, making major forecasting problems for standard meteorology which will be caught by surprise on occasions this month particularly in the most active parts (see pages 2-4) of the SWT Red Warnings [TOP SWIPS - Solar Weather Impact Periods] when snow or rain deluges and bitter winds are expected to notably exceed standard meteorological expectations.

Blizzards in Copenhagen greet Obama at Global Warming Summit!

WeatherAction New Year Message

Cont Jan AND Feb will be page 4 unusually cold in Britain, Ireland, & Europe

- Standard Meteorology / 'Global Warming' forecasts will fail AGAIN.

#### 'Man-Made Climate **Change'** is failed science based on fraudulent data

- Gordon Brown & all politicians, please, PROVE IT or DROP IT
- 2010 is the year of the fight for evidence-based science & policy
- Carbon Trading & all CO2 reduction schemes must stop.

### Climate Change *Policy* costs lives (WeatherAction New year message continued from page 4)

"ALL the predictions of CO2-based Global Warming / Climate Change 'Theory' since 2000 have failed as has the pretence of standard meteorology to do long range forecasting. The world is cooling while CO2 is rising, there have been less damaging storms not more and all the other extreme alarmist of the *Global Warmers* have been shown to be untrue (see <a href="http://www.copenhagenclimatechallenge.org/index.php?option=com\_content&view=article&id=48&ltemid=55">http://www.copenhagenclimatechallenge.org/index.php?option=com\_content&view=article&id=48&ltemid=55</a> & John Coleman founder of the Weather Channel <a href="http://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&

These failures are not just academic jokes at the taxpayers expense they are causing unemployment, misery & death. Tata steel is receiving carbon handouts for closing steelworks in the UK (<u>http://climaterealists.com/index.php?id=4720</u>). Children in the developing world are suffering starvation due to rising food prices following the burning of food as biofuels to keep – eg - misguided readers of the Guardian & Independent happy in the belief that their pet climate policies are *Saving the Planet*. Coach passengers died in Cornwall in December on a road that was an ice-sheet because the Council had run out of salt. What else would the Council do but run out of salt since the Met Office announced that this would be a mild winter in line with their Global Warming beleifs? **Like December the rest of this winter will be generally cold, icy and snowy and bring dangerous conditions in Britain, Ireland & Europe.** This WeatherAction forecast is the same as we made 6 months ago and is made with **95% confidence**.

The UK Met Office have now changed their 'probably mild' winter forecast to 'perhaps cold' for January & February. They say "For the rest of winter....the chance of colder conditions is now 45%; there is a 30% chance of average & 25% chance of milder conditions - <u>http://www.metoffice.gov.uk/weather/seasonal/2009/winter/</u> One must ask how many forecasts need the Met Office make before they get it right? ALL their forecasts for the unusually extreme seasons in the last 3 years were the opposite of reality (summers 2007, 2008 & 2009 and winter 08/09) whereas Weather Action's Solar Weather Technique – based on solar particle and magnetic effects - scored 4/4. The Met Office would be best advised to leave the issuing of their winter forecast till Feb 28th. Frankly their efforts and the rest of the Global Warmers club mislead the public and cost lives. The lesson of 2009 for Global Warming Policy is that it must stop. The lesson of 2009 for solar based long-range forecasting (the SWT) is that it works - as has been demonstrated dramatically on many occasions especially for extreme weather events. **The simultaneity of world weather extreme events is incomprehensible to standard meteorology but follows naturally from the Solar Weather Technique, which can also predict extreme weather events from many months ahead Three points for action in 2010 include:** 

- Campaign for accountable evidence-based science and policy with public meetings & actions. As a first step we ask that Gordon Brown organise a public event to which scientific observational evidence for CO2 theory be presented, further to his assertion that such evidence exists [see video <u>http://www.youtube.com/watch?v=EAV7NHZcEcY</u>]
- 2. Consumer Action. Refuse to buy goods which claim to be aimed at reducing CO2/Climate Change & ask that such dishonest claims end.
- 3. **Reach out to honest Greens and political activists** who are being brought down by the CO2 scam when all they want to do is defend bio-dioversity, nature's richness & people's rights & living standards".

**STOP use of fraudulent data! SIGN Downing St Petition!** <u>http://petitions.number10.gov.uk/UEACRU/</u> 'We the undersigned petition the Prime Minister to suspend the Climate Research Unit at the University of East Anglia from preparation of any Government Climate Statistics until the various allegations have been fully investigated by an independent body.' # No hiding place for Obama - swiped by another SWIP!

President Obama hoped for better portents as he fled Copenhagen blizzards WeatherAction had forecast by solar activity from a month ahead. But No! As he landed in Chicago another MORE MAJOR SWIP (*Solar Weather Impact Period 19-20Dec for extreme activity*) announced\* on Dec2 by WeatherAction struck swathes of East USA in the **worst blizzards for 10 yrs killing at least 5 people**. WeatherAction's forecasts for 19-31 Dec of ongoing deluges/blizzards is circulating freely in USA making it hard for Obama & Gore to claim Orwellian Doublethink that *it's Global Warming /Climate Change*; but doubtless they will!
